

Grade 6 Mathematics

OPTIMA ACADEMY ONLINE · FAMILY COURSE OVERVIEW · M/J GRADE 6 MATH · FLORIDA COURSE 1205010 · FULL YEAR

~4¼ hrs per week
50 min/day, M–F

About this overview. This document is an example of how the course might be taught. Scholars may see some variation in the lessons, examples, and practice sets from course to course, and between the live school and On-Demand. Each teacher also leans into their own strengths and passions; the structure, expectations, and time commitment below are representative of the course as designed.

Grade 6 Mathematics builds the bridge from elementary arithmetic to algebra. Scholars deepen their command of fractions, decimals, and integers, learn to reason with ratios, rates, and percentages, and finish the year writing algebraic expressions, interpreting data, and working with area and volume. Every module is organized around an essential question that connects the math to real-world problems, and each skill is practiced until it is solid before the next one builds on it.

THE YEAR AT A GLANCE

M1 **Integers, Rational Numbers & Absolute Value** (~2½ wks)
plot, compare, and order numbers; absolute value

M3 **Factorization, Composition & Exponents** (~2 wks)
GCF, LCM, prime factorization, distributive property

M5 **Integers** (~2 wks)
all four operations; order of operations

M7 **Collecting, Using & Interpreting Data** (~3½ wks)
mean and median, box plots, histograms, outliers

M9 **Area, Surface Area & Volume** (~2½ wks)
triangles, quadrilaterals, prisms, and pyramids

M2 **Operations on Fractions & Decimals** (~2½ wks)
multiply and divide; solve real-world problems

M4 **Ratios, Rates, Percentages & Conversions** (~3 wks)
unit rates, ratio tables, percents, conversions

M6 **Algebraic Expressions, Inequalities & Equations** (~3½ wks)
translate, simplify, and solve one-step equations

M8 **The Coordinate Plane** (~2½ wks)
plotting points, distance, area and perimeter

A TYPICAL WEEK

- A new lesson most days: teacher-guided instruction with worked examples and notes (about 30–35 min).
- Practice problems with every lesson, worked out on paper, to make each skill automatic (about 15–20 min).
- A review and module assessment as each module closes, roughly every two to three weeks.

TIME COMMITMENT

250 minutes / week

≈ 50 minutes a day, Monday–Friday

- Daily lesson + practice fills most of the 50 minutes.
- Module review and assessment days replace new lessons as each module closes.

WHAT SCHOLARS NEED

- A computer with reliable internet and access to Canvas.
- A dedicated math notebook, pencil, and paper — every problem gets worked by hand.
- A basic calculator is useful for checking work; the goal is fluency by hand first.
- Microsoft 365 and OneDrive (provided to every scholar) for any typed work.

On-Demand (asynchronous). Scholars move through the course at their own pace, with due dates to keep the year on track. An Optima teacher is available throughout for support, feedback, and grading.

Live school. Live-school scholars take this same course on Optima's VR campus with a teacher and classmates, meeting daily as a core course.
