Course
Overview

Note for Families: This overview reflects the planned course structure. Specific assignments, pacing, and assessments may be adjusted by your teacher. Always refer to your Canvas course for the most current information.

7th Grade Science is a full-year course that helps students understand how energy, Earth systems, and living systems change over time. This semester students investigate how science works, explore how energy moves and transforms, study wave behavior, and examine how organisms interact in ecosystems and how populations change through evolution. Students use scientific reasoning, models, and digital tools to make sense of patterns across physical and life science.

Semester at a Glance

Quarter 1 — Weeks 1–9

- Wk 1** Nature of Science: Observation, Inference, and Variables
- Wk 2** Hypotheses, Experimental Design, and Data Analysis
- Wk 3** Using Evidence to Support Scientific Explanations
- Wk 4** Physical Science: Energy Transformations
- Wk 5** Types of Energy and Energy Transfer
- Wk 6** Wave Behavior and Properties
- Wk 7** Waves as Energy Transfer
- Wk 8** Physical Science Review
- Wk 9** Quarter 1 Assessment

Quarter 2 — Weeks 10–18

- Wk 10** Life Science: Ecological Energy Flow
- Wk 11** Trophic Levels and Food Webs
- Wk 12** Interactions Between Organisms and Environments
- Wk 13** Introduction to Evolution
- Wk 14** Genetic Variation and Natural Selection
- Wk 15** Environmental Factors and Population Change
- Wk 16** Evidence for Evolution
- Wk 17** Life Science Review
- Wk 18** Quarter 2 Assessment

What a Typical Week Looks Like

Readings & Lessons

- READ** Readings and lesson pages in Canvas covering the week’s science concept
- NOTEBOOK** Science notebook entries: observations, models, and evidence-based explanations
- DISC** Discussion post responding to a science question, plus replies to classmates

Assignments & Assessments

- LAB/MODEL** Investigation, model, or digital activity applying the week’s concept
- QUIZ** Reading or lesson comprehension quiz
- EXAM** Unit exam at the conclusion of each unit

Weekly Time Commitment

- Class meets **5 days/week**, totaling **250 minutes of instruction** per week
- Estimated additional independent work: **1–2 hours/week**
- Notebook entries and discussions typically due mid-week; quizzes by Friday

What Students Need

- Reliable internet access and a Canvas-compatible device
- A Canvas account (provided by the school)
- Science notebook (physical or digital) for observations and notes
- All readings and resources provided in Canvas — no textbook purchase required

On-Demand Students

Work through modules at your own pace within the semester window. Deadlines appear in Canvas — aim to complete at least one section per day. Reach your teacher via Canvas messages.

Live School Students

Follow a structured weekly schedule with live sessions. Readings open Monday; discussions due Wednesday; labs and quizzes due Friday. Attend live sessions and check Canvas daily.
