

Grade 1 Mathematics

OPTIMA ACADEMY ONLINE · FAMILY COURSE OVERVIEW · GRADE 1 · FULL YEAR

~12½ hrs per week · 150 min/day, M–F

About this overview. This document is an example of how the course might be taught. This overview is drawn from the Florida course description and Optima's 2026–27 course plan rather than a fully built course, so scholars may see some variation in lesson order, activities, and examples from course to course, and between the live school and On-Demand. Each teacher also leans into their own strengths and passions; the structure, expectations, and time commitment below are representative of the course as designed.

Math Grade 1 builds strong number sense through a Singapore-style concrete-pictorial-abstract progression, emphasizing place value within two-digit numbers, addition and subtraction relationships, measurement (length, money, and time), and composing and decomposing geometric figures. Scholars practice these foundations through hands-on manipulatives and instructor feedback that makes mathematical thinking visible. Each new idea is met first with hands-on models, then pictures, then numbers and equations.

THE YEAR AT A GLANCE

1 Place Value of Tens and Ones (area of emphasis)

Understanding the place value of tens and ones within two-digit whole numbers, and composing and decomposing them with objects, drawings, and equations.

3 Measurement: Length, Money, and Time (area of emphasis)

Developing an understanding of the measurement of physical objects, money, and time.

2 Addition and Subtraction (area of emphasis)

Extending understanding of addition and subtraction and the relationship between them, with bar models for word problems where appropriate.

4 Geometric Figures (area of emphasis)

Categorizing, composing, and decomposing two- and three-dimensional geometric figures by their defining attributes.

A TYPICAL WEEK

- A new lesson most days, taught concrete-pictorial-abstract: hands-on models first, then pictures, then numbers and equations.
- Daily practice and number-sense routines that build fact recall and place-value understanding.
- Bar models for word problems where appropriate, so the structure of a problem is visible before the equation.
- Regular check-ins as topics close to see what each scholar has mastered.

TIME COMMITMENT

750 minutes / week

≈ 2½ hours a day, Monday–Friday

- The daily lesson and its practice fill most of the scheduled math time.
- Short number-sense and mental-math routines open or close many lessons.

WHAT SCHOLARS NEED

- A math notebook, pencil, and paper.
- Simple counters or everyday objects for the hands-on step of new concepts.
- A computer with reliable internet and access to Canvas.
- An adult to support young learners (especially in Kindergarten).

On-Demand (asynchronous). Scholars move through the course at their own pace, with due dates to keep the year on track. An Optima teacher is available throughout for support, feedback, and grading.

Live school. Live-school scholars take this same course on Optima's VR campus with a teacher and classmates, meeting daily as a core course.
